Intellectual Property Policy

Issued by Corporate Human Resources

Issue April 2017

(Extract from the comprehensive Code of Conduct)

Introduction

Intellectual property protection is critical to fostering innovation. Without protection of ideas, businesses and individuals would not reap the full benefits of their inventions and would focus less on research and development. The investment in our infrastructure reinforces our continued commitment to adopting international business practices and respecting intellectual property rights.

Purpose

Our intellectual property policy is intended to protect assets that may be integral to the core services and overall long-term viability of our business as well as others' businesses.

Key Policy

We respect intellectual property rights and will not infringe or violate any company's intellectual property.

Compliance with the policy

Our commitments are fully supported by our Board of Directors, with a detailed management system stating ongoing objectives and targets which provides the framework of delivery of this Policy.

Example - In November 2015, we embarked on our digital transformation journey by investing in Microsoft solutions for higher efficiency, productivity and security. The investment in our technology infrastructure reinforces our continued commitment to adopting international business practices and respecting intellectual property rights. This partnership is a testament to Shwe Taung (The Group)'s commitment to strong corporate governance and our respect for intellectual property rights.
